CMO 40 (Communications module)

Licenses

The following file lists third-party source code used by the *GLaDOS* project and the licenses accompanying them. This file also lists licenses for all of the submodules required by the *GLaDOS* project. If you decide to use any of the source code listed in this document in a product it is your responsibility to make sure that you adhere to the conditions and requirements set forth by the licenses.

Adhering to the Licenses

To adhere to the licenses within GLaDOS you need to provide attribution to the author of the source code as well as its license text in documentation and/or material accompanying the product. In JPI we suggest that you provide a disclaimer in the manual stating that you are utilizing open source code that directs the user to visit a dedicated web site where they can find more information (this should be a direct link and not a link to the main page of your corporation). A suggested disclaimer text to use in your manual is listed below.

Some software components of this product incorporate source code covered under an open source license. Please visit <https://opensource.your-corporation.com> for more details.

On the web site that is listed in your disclaimer you will provide the means for the user to access the open source notice as listed in the section *GLaDOS Open Source Notice* below while clearly marking which product and software version it relates to.

Please note that none of the open source code used within GLaDOS requires you to share said source code with a customer. You neither have to provide a way for the user to request such source code from you.

Other Open Source Software

This lists other open source software in use by GLaDOS but which we don't need to include in the license summary provided to the customer as they either have removed that condition from the source code or are compiled-out in the release binary.

FatFS

Please note! FatFS has a modified version of BSD-2-Clause that has removed the condition related to redistribution in binary form and hence do not need to be added to the list shared with the end user.

FatFs module is a free software that opened under license policy of following conditions.

Copyright (C) 2015, ChaN, all right reserved.

1. Redistributions of source code must retain the above copyright notice, this condition and the following disclaimer.

This software is provided by the copyright holder and contributors "AS IS" and any warranties related to this software are DISCLAIMED. The copyright owner or contributors be NOT LIABLE for any damages caused by use of this software.

Google Test

Please note! Google Test module is compiled-out in release and debug builds. Only used in unit test builds.
